Challenge the enemy by moving your own army of tanks through the European battlefield. Your decisions will literally make you the commander of the Allied Forces or the Nazi-Fascist armies. But then you can deploy ground troops or naval forces to get a better chance to destroy the enemy. However, the computer controlled forces are AI-controlled, and you have to be very careful when you deploy them to make sure that you don't cause a massive tank battle. Players take over the role of a tank commander through the Normandy campaign or in the Battle of the Bulge. The player can control the various units of the army and deploy them strategically to overwhelm the enemy. Players are also free to deploy additional units to the battle and make it easier to prevail. Each unit has its specific parameters, including fuel consumption, crew capabilities, and much more.
